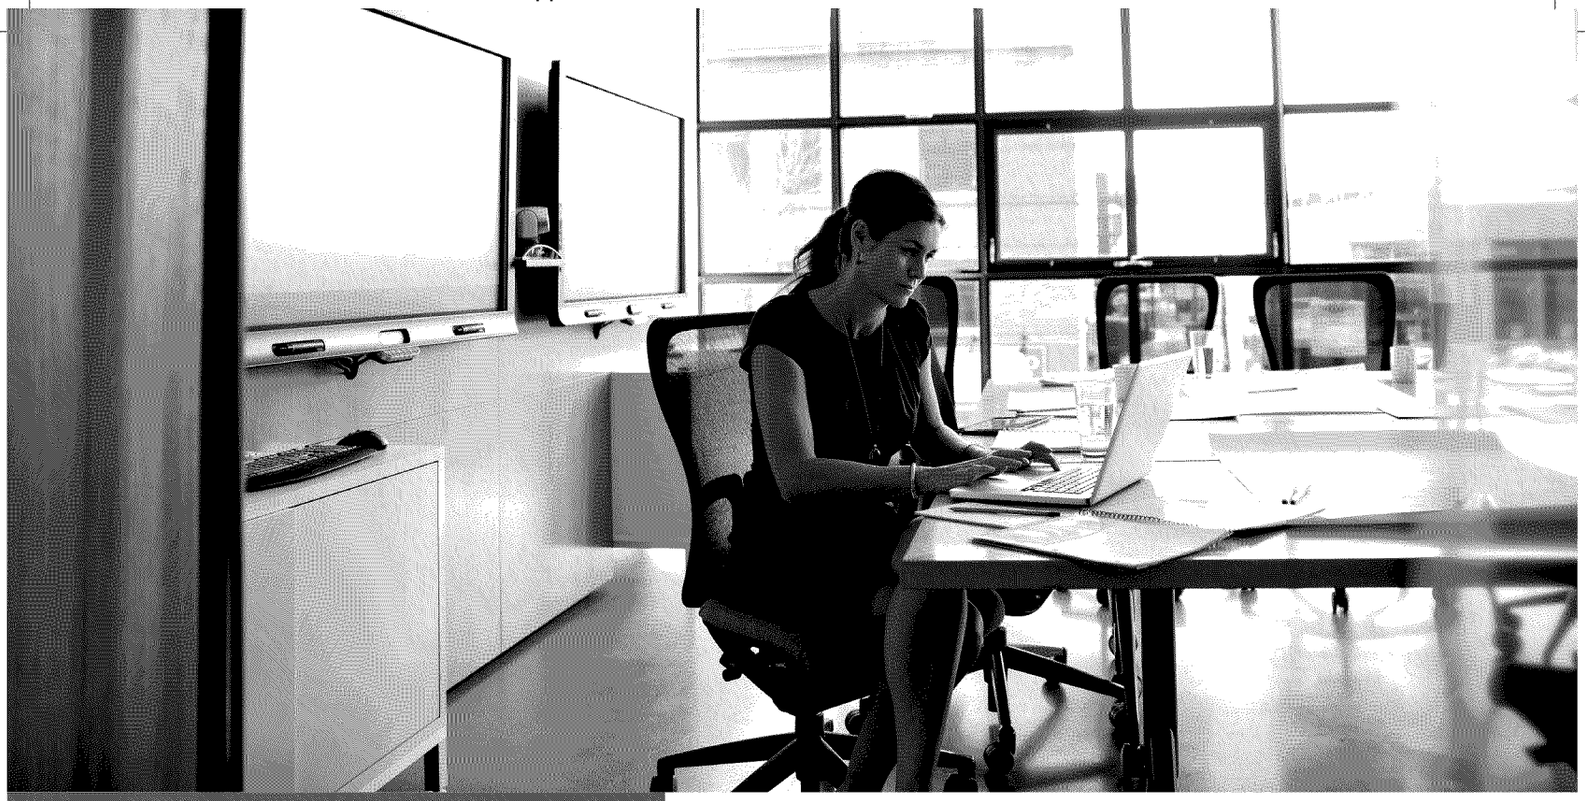
Approved for Release: 2021/04/01 C06825608



This is your chance to be your innovative best while contributing to America's national interests. It's more than a job – it's a mission of importance. Leverage your technical and interpersonal skills to make a positive difference on all information technology activities across the CIA and Intelligence Community.

Information Technology

OUR MISSION. YOUR FUTURE.

The CIA is consistently at the leading edge of science, engineering and technology. Now more than ever, it is essential to stay ahead of high-tech developments to fulfill the Agency's foreign intelligence mission. That's why we need men and women who – like you – want to use their extraordinary talents in a one-of-a-kind career.

There's unlimited opportunity for you at the CIA. We're focused on innovation and mission success – and we know one isn't possible without the other. Our core mission is to continuously enhance intelligence support to the President and the National Security Community through the application of information technology and information management.

Are you ready to protect your nation?

WHAT WE'RE LOOKING FOR

Innovative talent working for the safety of a nation. This requires an exceptional cadre of operational and technical experts to meet a wide range of requirements. Information Technology (IT) professionals work primarily in the Directorate of Digital Innovation (DDI) within the CIA.

We lead teams of functional and mission experts, represent the Agency in federal and Intelligence Community IT activities, and use both our technical and interpersonal skills to add value to every endeavor. The DDI strives to have a major and positive impact on all IT activities across the Agency. If you have been looking for a position where you can use your skills to make a real difference, the CIA may be the right career choice for you.

OPPORTUNITIES

- ***Applications Developer***
  Develop and deploy unique and critical applications in support of intelligence collection, production and dissemination. Support the CIA's global intelligence enterprise with an information advantage. Create solutions to reduce information overload, increase analyst collaboration, improve intelligence knowledge base and automate foreign text translation.

- ***Customer Service & Information Technology Officer***
  The customer's vital link for all information and technology services. Apply technical knowledge and customer service skills in a dynamic environment. Provide in-depth first-tier and second-tier support, analysis and problem resolution for customers on a wide range of IT products, applications and processes.

- ***IT Engineer***
  Use your background as a computer engineer, enterprise systems engineer or network engineer to design and deploy a secure, global computing infrastructure, leveraging the best of industry and internally developed solutions. Connect people and information systems to solve mission-critical challenges in the protection of national security.

- ***IT Project Manager***
  Manage programs and/or projects in direct support of the Agency's mission. Advance solutions that satisfy some of the Agency's most unique intelligence challenges. Develop requirements, complete engineering analyses, organize development activities; conduct performance, security and risk assessments; and transition systems to full operation.

- ***Telecommunications Information Systems Officer (TISO)***
  See the world while providing global support to the nation's Intelligence Community. Manage and maintain complex IT systems and WAN platforms, including commercial and proprietary terrestrial- or satellite-based communications systems. Provide project management and systems integration for voice and data communications systems, supervise the installation of these systems, and provide maintenance and close support to customers after installation. Some positions focus on critical primary and emergency power sources and complex HVAC systems. Other positions support intelligence and military tactical operations in conflict zones worldwide.

WHAT WE OFFER

In addition to the exceptional benefits of a federal career, the CIA provides outstanding career development opportunities, including:

- Extensive on-site mission, leadership, interpersonal, technical and project management courses
- Agency-sponsored undergraduate and graduate degree programs taught by major universities in Agency buildings
- Reimbursement for job-related, off-campus academic and vendor courses
- Internet-based access to over 2,000 technical courses, including industry standard certification programs

WHAT WE REQUIRE

Applicants must have US citizenship and the ability to successfully complete medical examinations and security procedures, including a polygraph interview. *An equal opportunity employer and a drug-free workforce.*

THE WORK OF A NATION.
THE CENTER OF INTELLIGENCE.
